

# Schools that care:

Cyberspace and social media offer exciting opportunities to create new networks, to share uplifting messages and to explore the world. It also opens up new platforms for schools to enjoy richer experiences.

It is important though, that School Governing Bodies and Staff are aware of the opportunities and risks associated with cyberspace to not only protect the learners, but also to manage the school's reputation and exposure.

Schools need to keep the following in mind:

- Do you have Policy in place that focuses on the use of smartphones and other electronic devices?
- Does the technology and systems the school uses, have sufficient protection?
- Does the school run a programme to facilitate and encourage "Responsible Digital Citizenship"?
- Have the Educators/ Teachers been briefed and trained to deal appropriately with cyberbullying, pornography and other related cyber incidents?
- Is there an approved process in place for the Staff and Representatives to follow if an incident is reported at the school to ensure that the situation is dealt with in a professional manner, protecting both the school and community's image and concerns.

These are the type of questions before incidents happen and *SaveTNet Cyber Safety* collaborate with schools to ensure that the abovementioned and more, are taken care of and managed effectively.

For a quotation and additional information contact Rianette Leibowitz at [Rianette@SaveTNet.com](mailto:Rianette@SaveTNet.com).

*Remember, your value is not determined by what is being said online,  
because each person is unique in his or her own way.*

*SaveTNet Cyber Safety* is a for-purpose company, which creates awareness for responsible digital engagement. Cyberbullying and related cyber issues are big focus areas, because many young people are committing suicide because of it.
